Codor

INTELLIGENT PROGRAMMING EDUCATION PLATFORM

Hagenberger Fünfeck @ GDG

Track C: Next-Gen Education

Members: Daxerer Christoph, Karer Lukas, Jung Simon, Habermaeir Florentin, Callec Matéo

Programming Exercises in Education

01 EXERCISE CREATION

Creating quality programming exercises requires significant time investment for teachers.

02 INDIVIDUAL SUPPORT

Supporting students 1 on 1 at home is basically impossible.

03 VISIBILITY GAP

What are students struggling with at home?

04 ASSESSMENT SCALE

Grading at scale takes a lot of time.

Introducing Codor

An intelligent platform that transforms how programming exercises are created, assigned, and completed

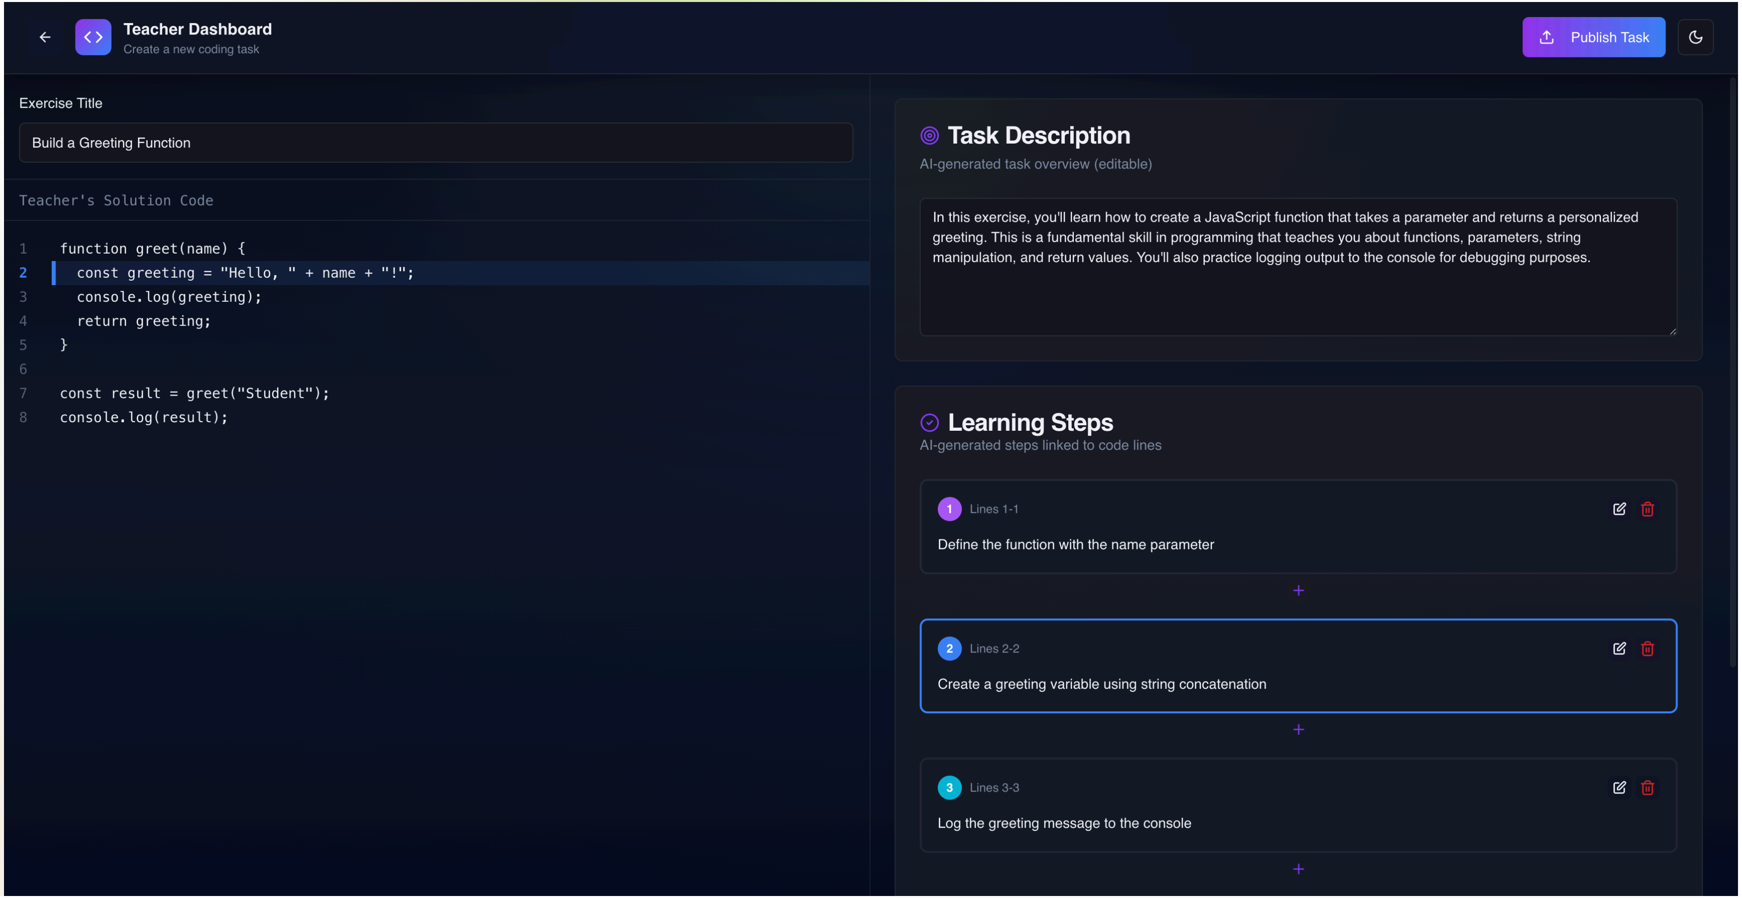
FOR EDUCATORS

Upload solution code and generate structured exercises automatically

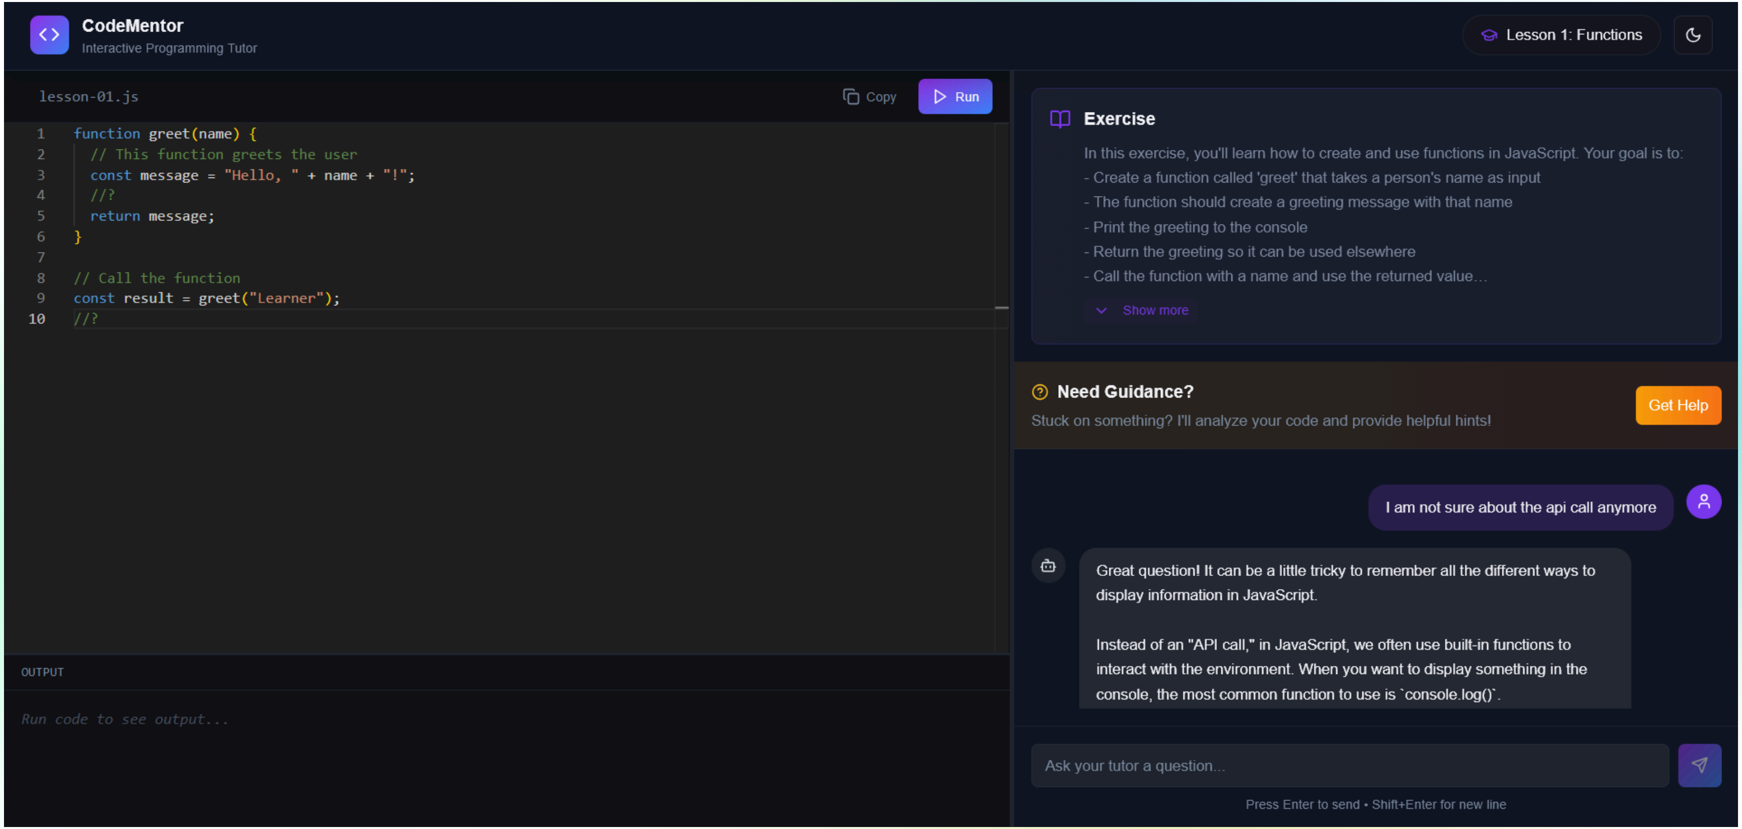
FOR STUDENTS

Receive contextual guidance without direct solutions

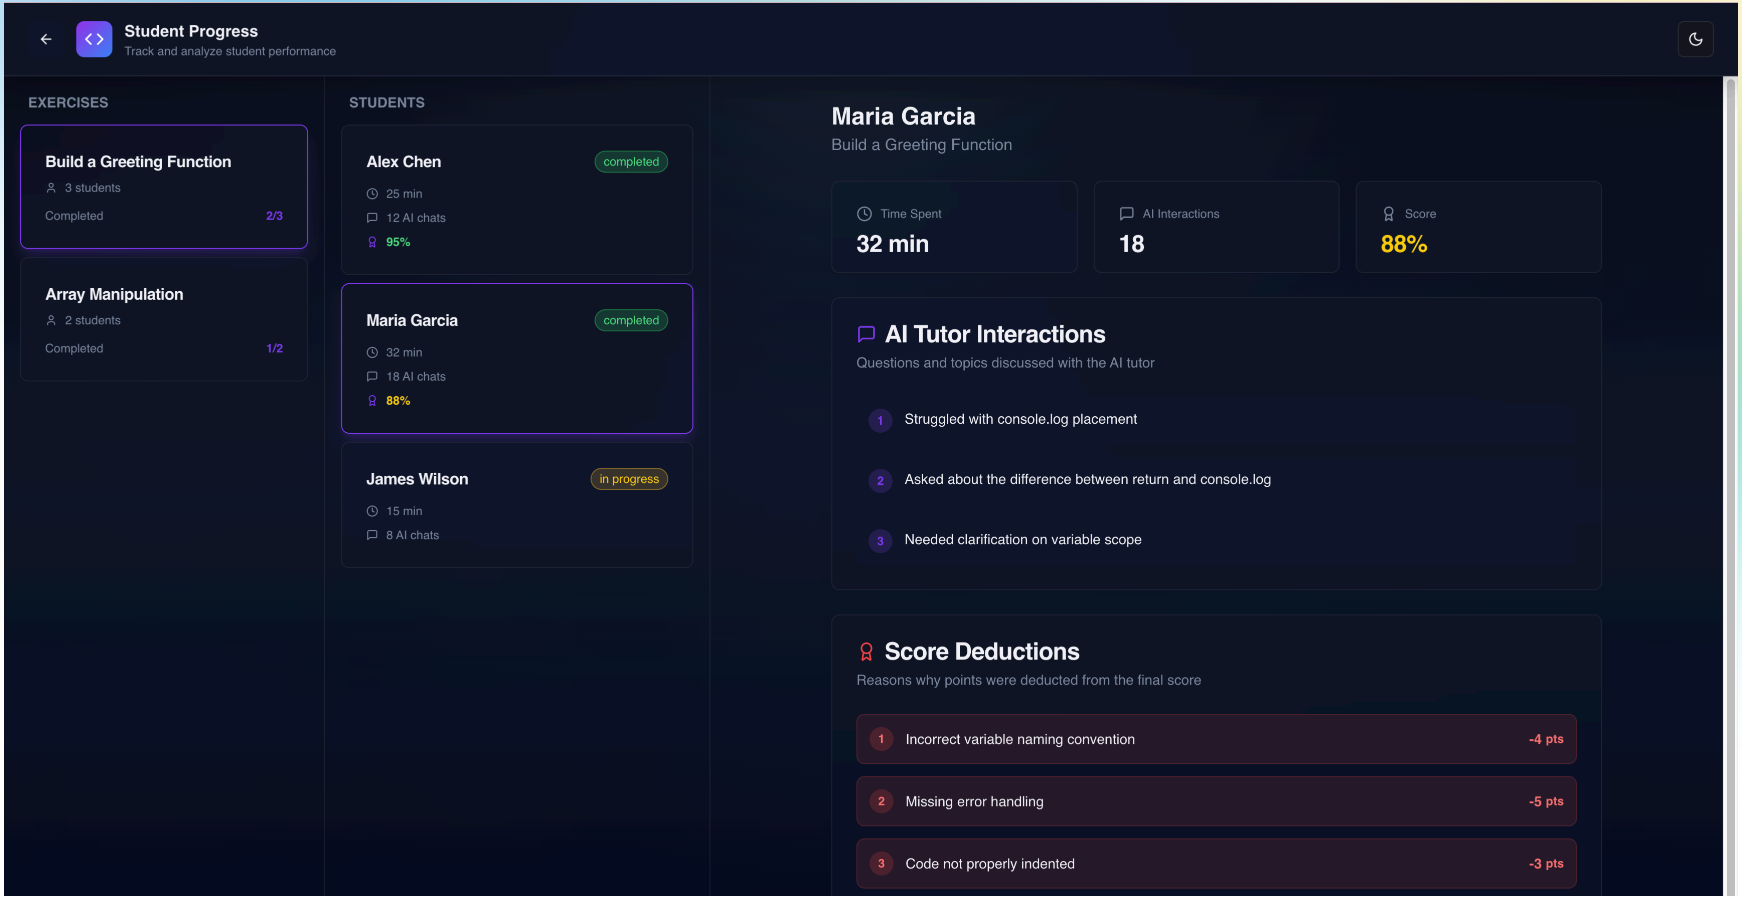
Creating an Assignment



Intelligent Guidance System

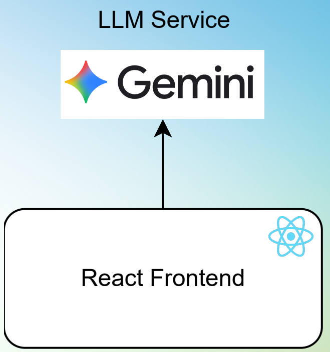


Analytics Dashboard



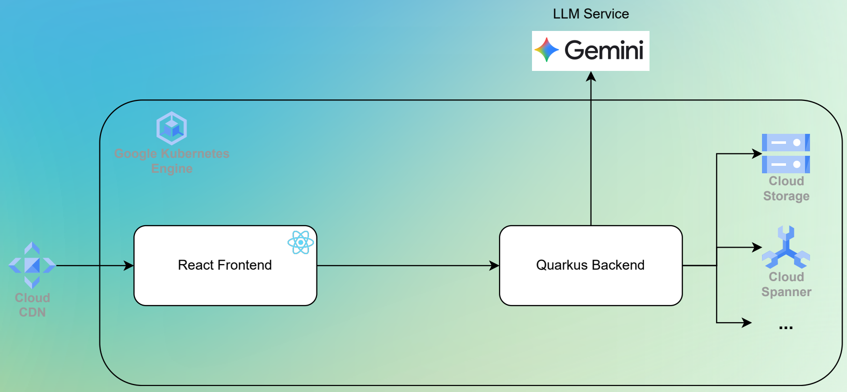
Architecture

CURRENT POC



Simple stack, everything is in the frontend, POC life 🤙

PRODUCTION SYSTEM



Scalable Architecture:

- Microservices backend
- Kubernetes deployment
- Cloud CDN for frontend
- Sandboxed code execution
- SSO integration
- …

Codor

Enhancing teaching effectiveness
Enabling independent learning

Transforming Programming Education
